 Brookfield, WI

Profile

Staff-level data scientist and product analytics leader with 10+ years of experience driving strategic growth across tech, e-commerce, and healthcare. Known for driving data-driven product decisions across cross-functional teams, with a proven track record influencing \$200M+ in GMV, optimizing product experiences, and building scalable experimentation platforms. Expert in A/B testing, SQL, R, and stakeholder communication. Ph.D. in Biochemical Engineering.

Skills

Technical: SQL, R, Python, dbt, Databricks, Mode, Mixpanel, A/B Testing (design, power analysis, causal inference, JIT assignment, stratified sampling, sequential testing), Experiment Automation

Product Analytics: KPI Development, Metrics Frameworks, Diagnostic Dashboards

Soft Skills: Stakeholder Communication, Strategic Thinking, Cross-Functional Leadership

Experience

Senior Data Scientist, Hinge Health (San Francisco)

2024 – 2025

Led product analytics across the Exercise Platform, Exercise Experience, and Computer Vision teams, partnering with 20+ engineers, designers, and PMs on end-to-end product development, experimentation, and impact measurement.

- Designed and built a modular in-house experimentation pipeline, cutting turnaround time from hours to minutes; served as proof-of-concept that shaped team workflows and onboarding to StatSig.
- Diagnosed a gap in experimentation culture through SWOT analysis, identifying weak ideation as a strategic risk; led design and rollout of a framework now adopted org-wide (10+ pods), generating hundreds of ideas per team and embedding experimentation into planning culture.
- Proposed and built the Computer Vision product health dashboard, establishing a clear NSM and driver framework; enabled stakeholders to identify adoption bottlenecks and shift 2025 roadmap focus from quality to penetration.
- Developed a dbt-powered data cube to monitor personalization engagement; surfaced high-friction moments that informed cross-functional UX improvements.
- Authored internal blog deriving sample size from first principles; findings drove adoption of just-in-time assignment and materially reduced experiment runtime.
- Championed culture-building through DS feedback forums, AI upskilling events, and a DS team flipbook celebrating impact and growth.

Senior Data Scientist, Instacart (San Francisco)

2020 – 2023

Led product analytics across Storefront, Cart, Checkout, and Post-Checkout, partnering with 50+ engineers, designers, and PMs to drive end-to-end product development, experimentation, and strategy.

- Delivered insights that drove product redesigns and high-impact A/B tests, contributing to over \$200M in incremental GMV.
- Built and launched a self-serve diagnostic experimentation product that decomposed KPIs into their key drivers, enabling teams to pinpoint who and what was driving test outcomes; scaled org-wide and recognized by leadership as the “most impactful DS initiative.”

- Reengineered core experimentation pipelines, cutting processing time by 90% and reducing compute costs by \$1M annually (25%).

Consultant, Knowledge Leaps (San Francisco)

2019 – 2019

- Delivered a marketing ROI model and provided insights into the factors contributing to year-over-year sales declines, enabling strategic adjustments to improve performance for a grocery chain in the Southeastern U.S.

Data Scientist, Chegg (Santa Clara)

2017 – 2018

- Managed a team of data scientists to deliver predictive models for CLV and marketing engagement across 16M customers.

Product Analyst, eBay & PayPal (London, San Jose, San Francisco)

2011 – 2017

- Accepted into eBay's Leadership Development Program to lead high-impact projects across Checkout, Managed Marketplace, Gift Cards, StubHub, and PayPal Growth Experimentation.

Analyst, Vodafone (London)

2007 – 2011

Education

Ph.D.: Biochemical Engineering, University College London (London)

2002 – 2007

BEng.: Biochemical Engineering, University College London (London)

1999 – 2002

Portfolio

- **PhD Thesis:** [Novel engineering tools to aid drug discovery processes](#)
